PROFILE

I am Aasif, a Data Analyst with 6 months of experience in data cleaning, data visualization, and reporting. Skilled in Excel, SQL, Python, Power BI, and Statistics. Detail-oriented and analytical, with strong abilities in trend analysis, dashboard creation, and supporting data-driven decision-making.

PROFESSIONAL EXPERIENCE

Data Analyst Trainee

05/2025 – Present | Noida

Uncodemy Pvt. Ltd.

- Performed data cleaning and **preprocessing**, and validation to maintain high data accuracy and consistency.
- Developed interactive dashboards and analytical reports using **Power BI** and **Excel** to support decision making.
- Utilized **SQL** and **Python** for exploratory data analysis, trend identification, and performance evaluation.
- Assisted in generating **statistical** summaries and detailed business insights for project documentation.
- Collaborated with mentors and team members on real-time analytical projects, ensuring timely and data-driven recommendations.

PROJECTS

UPI Transaction Dashboard

09/2025 – 10/2025

UPI Transaction Analysis Dashboard in Power BI

- Developed an interactive Power BI dashboard to analyze UPI transaction data, including volume, value, success rate, and user behavior.** This helped visualize key payment trends and provided clear insights for better decision-making.
- Cleaned, transformed, and modeled raw transaction data using Power Query and DAX for accuracy and efficiency.** Ensured high-quality datasets that powered reliable and fast-performing reports.
- Designed visually compelling reports with custom KPIs, slicers, and drill-down charts.** Enabled users to explore time-based and category-wise trends quickly and intuitively.
- Implemented dynamic filters and user-friendly navigation throughout the dashboard.** Improved the overall user experience, making insights more accessible to stakeholders.
- Automated data refresh and optimized report performance for real-time transaction monitoring.** Reduced manual efforts and ensured the dashboard always reflected the latest UPI data.

E-Commerce Data Modelling

08/2025 – 09/2025

E-Commerce Dataset Modelling for Business Intelligence and Reporting

- Designed and structured an optimized e-commerce data model using SQL to enhance query performance. Improved overall data retrieval efficiency by **30%**.
- Developed **Python** scripts to automate data cleaning, transformation, and insertion tasks. Reduced manual effort significantly and improved data consistency.
- Created SQL **procedures, functions, and triggers** to improve analytical depth and ensure data accuracy. These enhancements supported insights that increased company profit by 15%.
- Performed exploratory data analysis to identify customer behavior **patterns**, sales trends, and product performance. Insights contributed directly to strategic decisions and revenue growth.
- Built interactive Power BI **dashboards** to present **KPIs** and simplify business **performance** tracking. Enabled faster, data driven decision-making across teams.

SKILLS

Python, SQL, Power BI, Tableau, Statistics, Excel, Machine Learning Algorithms, NumPy, Pandas, matplotlib, Seaborn

TOOLS AND PLATFORM

Vscode, Jupyter Notebook, Google Colab, Microsoft 365, PyCharm, Postgres, SQL Server, SQL workbench, Anaconda

EDUCATION

B.Tech

03/2021 – 08/2024 | ranchi

Jharkhand university of technology
